

Strategies for Building Independent and Responsible Students: Fostering Resiliency in our Children

New this year to Sea Girt Elementary School is the establishment of the SGES Parent Academy. These academies are designed to provide parents with tools to enhance parenting skills and promote students' academic achievement, social and emotional growth. Our first of three academies will be hosted on October 31st at 9:00 a.m. This date was selected knowing that most parents attend the Halloween Parade and would thus provide an opportunity for both parents to attend this most important kickoff event.

Our first speaker is Patricia Baszczuk, Ph.D. Dr. Baszczuk is a Forensic Neuropsychologist who will be presenting, "Strategies for Building Independent and Responsible Students: Fostering Resiliency in our Children." At the end of the presentation, Dr. Baszczuk will host a question and answer discussion forum.

We expect that this kick off event will be extremely well attended, as Dr. Baszczuk is a highly sought after presenter. While registering to attend is not required, we would appreciate that if you are interested in attending this event, please use the link on our school's web page to register. This will help us to prepare the appropriate amount of materials.
