This week in 8th grade math the students learned about scatter plots and the different vocabulary associated with it. The students were given whiteboards and specific data to plot. The students then created a line of best fit or "trend" line to represent the data. They identified the type of correlation and if made sense based on the scenario. The exciting part is that the students used skittles to plot the points! Great job 8th grade, keep up the good work!

This week in Homeroom the students reflected on the quote, "Character is the ability to carry out a good resolution long after the excitement of the moment has passed" by Cavett Robert. The students then discussed what a New Year's Resolution is and that it must be achievable and realistic for them. The students then wrote their own long term resolutions to carry out through the year. The students read their resolutions to at least one classmate to help themselves to be more accountable. Great work 6th grade homeroom! You did a good job reflecting and expressing your personal thoughts. Next week the students will be partaking in activities that promote building relationships related to bullying prevention. Great job 6th grade, keep working hard!
