Next Week's Happenings...

Week of February 5th:

(Please visit the Assessments Calendar tab on my class website as changes may occur)

Tuesday, 2/6:

Geometry
(Chapter 7 & 8 Test)
7th Grade
(9.1 & 9.2 Quiz)

Wednesday, 2/7:

6th Grade
(4.1 - 4.6 Quiz)

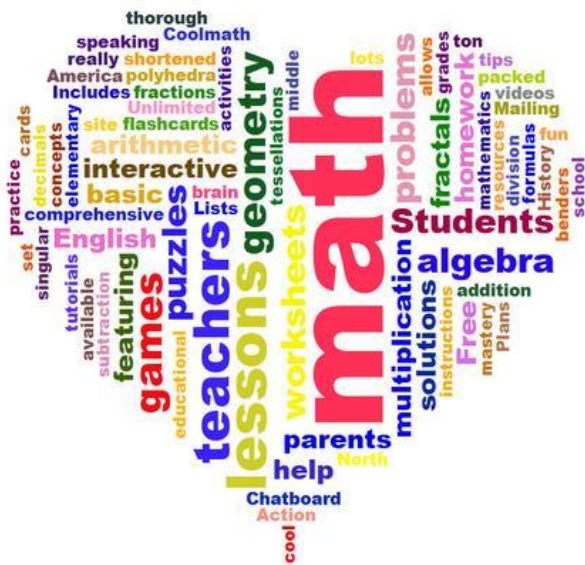

Friday, 2/9:

Algebra 1
(Exponent Rules Quiz)

This week in Geometry: The students in geometry continued discovering theorems with the use of constructions. This week, the students circumscribed a circle to find the circumcenter and also found the centroid of a triangle. The students discussed how to identify these key parts of a triangle and also discovered that the centroid is the center of a triangle. The students tested it out by balancing the triangle from that point of concurrency on their pencils. Great job Geometry students, keep up the awesome work!

This week in 6th Grade Math:

The students in 6th grade math have been working extra hard learning how to solve equations using inverse operations and rational numbers. The students participated in a stations activity to practice their skills and also discuss their knowledge with their classmates. In addition, the students completed a vocabulary support worksheet to ensure that they are using proper mathematical language. Great job 6th grade!
