This week in Geometry: The students in Geometry participated in multiple discovery lessons this week. Using a new online tool called GeoGebra the students discovered the Exterior Angles Theorem and the Polygon Sum Theorem. It was a great hands-on experience and they enjoyed the discovery component. Great job Geometry students, keep up the great work!

This week in Algebra 1: The Algebra 1 students began using Graphing Calculators this week. Using this device, they students discovered what the graph of an absolute value function looks like and how the function equations related to the graph. The students used different tools on the calculator to become more familiar with the device. Great job Algebra 1 students, keep working hard!
