## Week of October 22<sup>nd</sup>:

(Please visit the Assessments Calendar tab on my class website as well as your student's Google Calendar as changes may occur)

Tuesday, 10/23

Geometry

(Quiz: Angle-pair relationships & proofs)

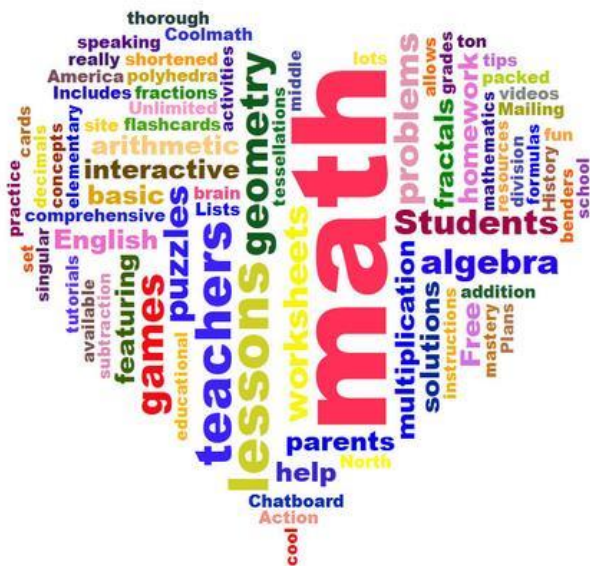

Friday, 10/26

8<sup>th</sup> Grade Math

(Chapter Test: Solving equations & real world applications)

This week in 6<sup>th</sup> grade math the students learned about the different types of numbers, including rational numbers, and practiced plotting numbers on a number line. To become more proficient at this skill, the students partook in 3 different online games. These games can also be found on Google Classroom where they will be able to practice more at home. Great job 6<sup>th</sup> grade, keep up the great work!

This week in **Geometry** the students began to write formal geometric proofs. The students applied their knowledge of different angle-relationships as well as accessed prior knowledge of properties and definitions to proof different theorems. The students compared their proofs with one another which helped them recognize that although their statements and reasons may be different, their end result is still the same. Great job Geometry students keep working hard!
