## Week of November 18<sup>th</sup>:

(Please visit the Assessments Calendar tab on my class website as well as your student's Google Calendar as changes may occur)

Tuesday, 11/19:

Algebra 1

(Quiz: 4.1 - 4.3)

7<sup>th</sup> Grade Math

(Quiz: 4.5 & 4.6)

8<sup>th</sup> Grade Math

(Quiz: 3.1 - 3.3)

Wednesday, 11/20:

6<sup>th</sup> Grade Math

(Quiz: Topics 3.4 - 3.7)

Friday, 11/22:

7<sup>th</sup> Grade Math

(Topic 4 Assessment)

## This Week in Math:

**Algebra 1** students started learning about graphs and functions this week. This topic is crucial for an understanding of Algebra 1. The students not only created graphs relating two quantities, but they also came up with scenarios and had to accurately create the graphs of their classmate's scenarios. Algebra 1 students will continue moving forward with graphs and functions, and proceed to learn about four specific types of functions, what their graphs look like, how it relates to the equations, critical attributes of each of the graphs, etc. Great job Algebra 1 students, keep up the great work!

**7<sup>th</sup> Grade Math** students continued learning about percent this week and how it relates to real-world scenarios. To continue expanding their knowledge, the students learned about markups and markdowns as it relates to stores purchasing and reselling items for more money, items being marked down because they are going on sale, the value of items increasing or decreasing overtime, etc. The students did a great job using the models, setting up the equations and/or proportions, and applying their knowledge of percent in the real world. Great job 7<sup>th</sup> grade, keep working hard!
