

Mrs. Lazarchick's Newsletter

Week of December 16th:

(Please visit the Assessments Calendar tab on my class website as well as your student's Google Calendar as changes may occur)

Tuesday, 12/17:

7th Grade Math

(Quiz: Topics 5.4 - 5.6)

Thursday, 12/19:

6th Grade Math

(Quiz: Topics 4.1 - 4.5)

Algebra 1

(Quiz: Linear Functions)

Friday, 12/20, is a half day as well as the holiday party!

This Week in Room 202:

8th Grade Math students learned about scatter plots this week. The students discussed what a scatter plot is and how to describe the relationship between variables as well as identify the type of correlation, if there is one at all. In addition, the students learned how to draw a line of best fit, also known as a trend line, and write the equation for the line. This relates to the unit that the students just completed on linear equations. To write the equation of the line, the students had to find the slope using two points as well as use one of those points to find the y-intercept. In addition, with scatter plots, the students discovered the purpose for writing this equation and the reason why it is important. To demonstrate further understanding, the students began working on a project based on scatter plots in groups of two. The students selected a relationship of their choice, and will have to present their data to the class next week. Great job 8th grade students keep working hard!
