## Next Week's Happenings...

### Week of December 11th:

(Please visit the Assessments Calendar tab on my class website as changes may occur)

#### **Tuesday, 12/12:**

(I will not be in class from 11:45 - 3:00 due to cohort training)

#### **Wednesday, 12/13:**

Math 7

(Quiz: 7.1-7.4)

#### **Friday, 12/15:**

Geometry

(Chapter 5 Test)

Math 6

(Quiz: 3.4-3.6)

\*7<sup>th</sup> & 8<sup>th</sup> Grade Field Trip  
w/ Mrs. Silvestri on Thursday, 12/14\*

**This week in Geometry:** The geometry students have been working very hard at completing 2-column proofs. They have been applying their knowledge of theorems, definitions, postulates, and properties since the beginning of the school year to now to prove that two triangles are congruent using the fact that Corresponding Angles of Congruent Triangles are Congruent (CPCTC), Side-Angle-Side (SAS), and Angle-Side-Angle (ASA). To end the week, the students worked together to apply their understanding. Keep up the great work!

**This week in Algebra 1:** The Algebra students have been applying the three different forms of a linear equation to graph linear functions, write the equations of a linear function, and apply real world models using all three forms. They identified the difference between all forms and when each is appropriate to use. In addition, they worked collaboratively as a class and with partners to practice. Great job!
