Week of February 24th:

(Please visit the Assessments Calendar tab on my class website as well as your student's Google Calendar as changes may occur)

Monday, 2/24:

6th Grade Math

(Quiz: Topics 5.1 - 5.4)

Tuesday, 2/25:

7th Grade Math

(Quiz: Topics 7.1 - 7.3)

Thursday, 2/27:

8th Grade Math

(Quiz: Topics 6.1 - 6.3)

Friday, 2/28:

Algebra 1

(Quiz: Topic 6.6)

This Week in Math:

6th Grade Math students participated in different stations activities this week to review new material on ratios and comparing ratios. The students learned many different models, such as double line diagram, bar diagram, and a table to compare ratios. The students also began graphing ratios on a coordinate plane to solve problems. The students were able to see that when you are adding the graph is increasing however when you are subtracting the graph is decreasing. They were also able to use the table to plot the coordinate points on the graph, showing understanding of how ratios relate to coordinate points. In addition, the students reviewed the importance of knowing about positive and negative numbers and how they apply, or do not apply, in real world example problems. The students did an excellent job working in groups to practice and demonstrate their knowledge. Great job 6th grade students keep working hard!
