

Mrs. Lazarchick's Newsletter

Week of February 17th:

(Please visit the Assessments Calendar tab on my class website as well as your student's Google Calendar as changes may occur)

Thursday, 2/20:
6th Grade Math
(Quiz: Topics 5.1 - 5.4)

Friday, 2/21:
7th Grade Math Quiz
(Quiz: Topics 7.1 - 7.3)

There will be no school 2/10 - 2/14

Have a wonderful, relaxing, and well-deserved February break!!

This Week in Math:

6th Grade Math students learned a new concept this week. The students learned the definition of a ratio and the three different ways to write a ratio. The students also used different models, such as a bar diagram and a double number line diagram to solve different real-world application problems involving ratios. The students ended the week with a fun coin flipping activity where they not only found ratios, but also learned the value of probability and how it can change what might seem theoretical based on experiments. Great job 6th grade students keep working hard!

Algebra 1 & 8th Grade Math

students learned three different methods for solving systems of equations: graphing, substitution, and elimination. The students worked hard to not only solve problems, but also identify unknown information and create equations based on real-world application problems. Great job Algebra 1 & 8th grade students, keep up the great work!
