

Ms. LaCugna's Newsletter

Week of February 19th:

(Please visit the Assessments Calendar tab on my class website as changes may occur)

Monday, 2/19:

Algebra 1

(Exponent Rules Quiz)

Tuesday, 2/20:

Geometry

(Chapter 7 & 8 Test)

Friday, 2/23:

7th Grade

(Chapter 9 Test)

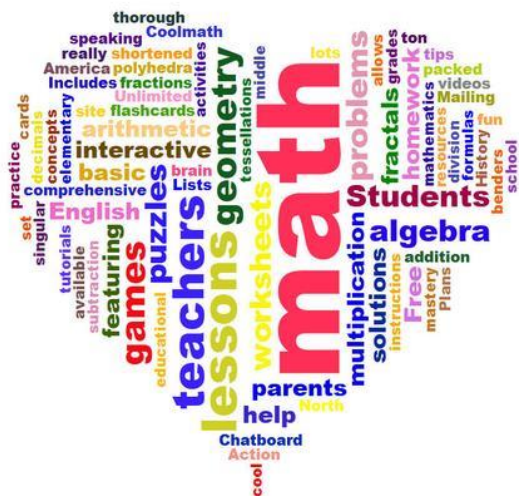

****Have a wonderful February
break and a very Happy
Valentine's Day!****

This week in Algebra:

The Algebra 1 students began a new unit of exponent rules. The students learned how to apply exponent rules when multiplying and dividing with the same base. The students also discovered why a value with an exponent of 0 will always be 1 (except for 0), and the reason why a value with a negative exponent must be written in the denominator or numerator based on where it was previously located. The students then worked with their partners to complete a DESMOS activity where they matched different expressions applying their knowledge of the rules, explained the rules, and created their own expression to be simplified. The students will have a quiz on all of the exponent rules when we return from February Break. Great job Algebra 1, keep working hard!

This week in 7th Grade Math:

The 7th grade students have been working hard to apply real world problems related to discounts, tip, tax, and methods of payment. Great job 7th grade, keep up the great work!
