Week of April 16th:

(Please visit the Assessments Calendar tab on my class website as changes may occur)

Friday, 4/20:

Algebra 1

(Quadratics Quiz)

7th Grade Math

(Equations/Inequalities Quiz)

6th Grade Math

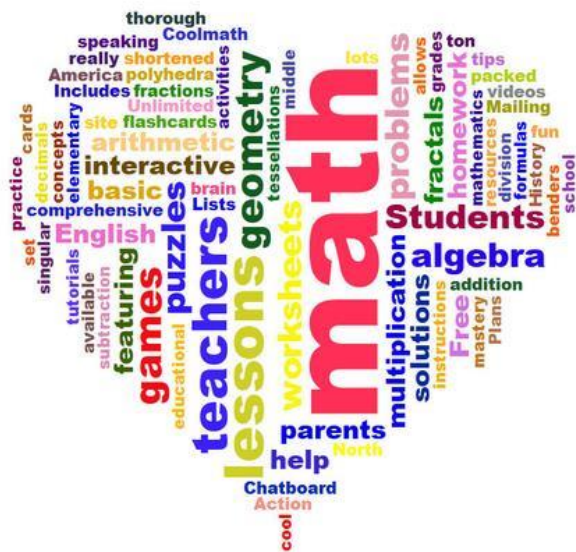

(Rates Quiz)

**Marking period 4 begins on
Monday, 4/16**

**PARCC ELA testing begins on
Tuesday, 5/1 followed by Math on
Monday, 5/7**

This week in Geometry: The students in geometry discussed what makes figures similar and how to identify if figures are indeed similar, both on and off of the coordinate plane. The students worked hands-on to construct dilations using their compass and constructed similar triangles using AA similarity and their prior knowledge of copying an angle using their compass. Great job Geometry students, keep working hard!

This week in 7th Grade Math: The students worked very hard this week to learn solving 2-step equations involving fractions, decimals and distributive property. They worked in groups, with partners, and as a whole class, practiced their skills using an online connect 4 activity as well as Pearson, and ended the week with a quiz to demonstrate their knowledge. Great job 7th grade, keep up the great work!
