This week in Geometry the students were introduced to important vocabulary, learned their first postulate (and what a postulate is), and began doing constructions. The students used a new compass tool to complete this task. A picture of the tool can be found on my class website on the geometry page. They have also been incorporating their algebra skills that are integrated in the geometry concepts. Great job, keep working hard!

This week in 8th grade math the students learned how to convert repeating decimals to fractions; a concept that they have never learned before. They used their knowledge of place value and solving equations to successfully convert. The students will be assessed next week on their knowledge. Great job everybody, keep up the great work!
