E-mail: dlacugna@avonschool.com Phone: 732-775-4328 ext. This week in Algebra 1: The Algebra 1 students learned about similar figures, proportions, and scale drawings. The students completed an activity where they used yard sticks and measuring tape to measure their height, shoulder width, and foot length. After finding this information, the students used their knowledge of proportions and scale drawings to identify what the measurements would have to be if they wanted to make a giant statue of themselves and if they wanted to make an action figure of themselves. The students did a great job working in pairs to identify this information. The fascinating part was that every student's answers were different because it is unique to their individual information. Keep up the great work Algebra 1!
