5th: We began looking at physical and chemical changes this week and are determining how to tell them apart! Fun hands on labs with cleaning pennies and mixing different substances

6th: We finished up classification of living organisms. Learned how different species are named and used dichotomous keys to classify!

7th: It was all about summative Properties of Matter/Chemical Reaction Lab prep this week! Big assessment on Monday!

8th: We finished up a hands on simulation of how gene frequency in a population changes over time depending on environments!
