

MRS. DOUGHERTY'S SCIENCE NEWSLETTER

Announcements:

Health Barn assembly was a huge hit! Ask your students about all the new and interesting food they got to sample 😊

Always looking for donations!
Message me if you have any questions!

5th & 6th: This week, students are in the driver's seat! They are using what we have learned about variables, hypotheses, and data to design and conduct their own controlled experiments! Results to come

7th: Learning more about what gives different substances different properties on an atomic level!!
Exciting stuff – going to be breaking down the Periodic Table next week!

8th: Diving in to what makes you, you and me, me! We are uncovering why there is variation between parents and offspring and between offspring of the same parents! Interesting stuff!
Home connection: Talk at home about your varying traits, the kids will love it!!
