5<sup>th</sup>: Started to discuss the structure of matter and began investigations of solids, liquids and gases. Then we used what we had learned to create magnetic slime!

6<sup>th</sup>: This week, we spent time creating models of plant and animal cells. We will be presenting these models after the break!

7<sup>th</sup>: We created some scientific arguments about whether chemical change had taken place based on evidence collected during a lab. Then made borax crystal ornaments with a supersaturated solution!

8<sup>th</sup>: We began our investigation of Natural Selection by making observations of populations!
