5<sup>th</sup>: We completed our properties of matter investigation and used our hands on investigations to learn about many different properties!

6<sup>th</sup>: Students created Facebook page posters for assigned cell organelles. We interacted with each others posters to leave comments that connected our organelles! Quiz next Monday!

7<sup>th</sup>: We conducted several labs to investigate physical and chemical properties of matter this week. Very exciting

8<sup>th</sup>: Students participated in a science seminar – student led discussion on inheritance vs. mutation and completed a CER writing piece to finish out this unit.
