5<sup>th</sup>: Assessment Monday for our Chemical and Physical changes unit!! We finished our mysteries with an exciting explosion of baking soda and vinegar in a bag this week! 6<sup>th</sup>: We made POOP!! Seriously, the class participated in a really fun model of the digestive system to learn where the molecules that cells need come from! So much fun!!

7<sup>th</sup>: We learned all about the natural products that are used to make synthetic products such as plastic bottles, medications and artificial sweeteners. We investigated the chemical processes needed to create these products!

8<sup>th</sup>: Diving deeper into evolution and the mechanisms that cause changes in species over time as well as the evidence!
