5th & 6th Science: We conducted our first hands on investigation with The Penny Lab to see how many drops of water we could fit on one side of a penny and if soap affected this number. We practiced making more sophisticated hypotheses which identify variables.

7th Science: A very exciting week filled with metric conversion activities and even The Olympics of metric conversion!

Flex: We began flex this week! Avon Olympics picked countries to represent in the Olympic challenges! Can't wait for this each week!
